

Wikipath

©2007, Stand Alone, Inc.

Iron Coder V submission

Wikipath takes a random walk through the world, as represented by Wikipedia. Starting from a particular page (by default, "Life"), Wikipath randomly jumps from link to link, until it hits a dead end.

Wikipath uses the Screen Saver API (as it is, in fact, as Screen Saver). Its default seed is Life, and from there it goes in a random direction (just like Life).

All source is provided, and is freely re-distributable, modifiable, editable, and any other -
ables you care to append. Stand Alone, Inc. makes no claim to it, and anyone can do
anything they like with any part thereof.
